1. Sharing the API details received from Master control with Vendor
2. Implementing them on our system
3. XYZ

Action Items
Profile Mapping with document types
Token development and check different possibilities
Need to explore the configuration menus on new URL provided by Master Control
Parameters can be sent from API as parameters? or we need to filter out the results [External/Internal users] – Need to confirm this point with Master Control
Modify Overlay processing module. Currently this uses python and recreates the overlay fields, with fonts etc. on the document PDF. This approach is seen to have many issues. Idea is to use a library which will just merge the overlay file with the document file (PDF stamping) and not recreate each field on the document PDF. Libraries like iText, ASPOSE to be used.
